

625-540 QUAD Passive Interface

Description

The 625-540 QUAD passive interface is used for interfacing the TDM bus in Base Unit 625-802 / 3 and 4. Each bus is serial connected and terminated at the last bus with 625-541 Termination. The maximum length of the patch cable (645-1xxx) is 100 cm.

Technical specification:

Inputs

Data rate: 270 Mbs ECL ballanced input
Connector: RJ45 (110 ohm)

Outputs

Data rate: 270 Mbs ECL ballanced input
Connector: RJ45 (110 ohm)

625-541 Termination
